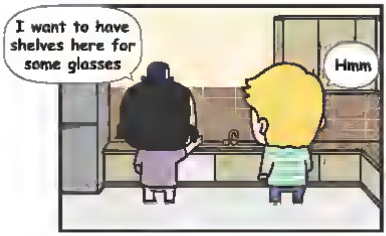
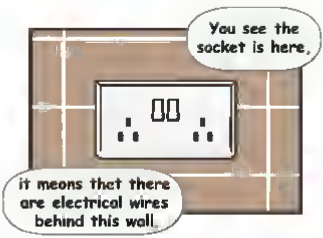
To put up a shelf : part 1

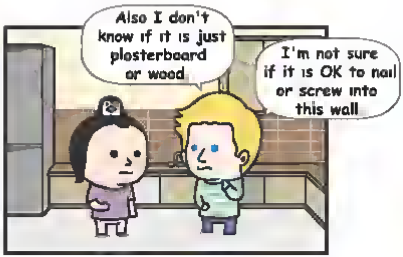
After we moved into our new flat,
we started to make the place a home.



I wanted to have some selves on the empty wall in the kitchen.

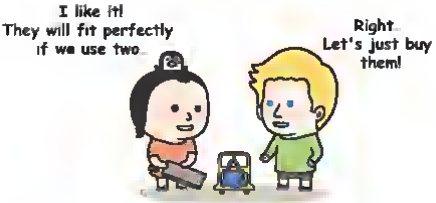
Normally, Mev likes putting things together or fixing things and he was good at it so I thought he would have no problem.





But as there were some issues, ..

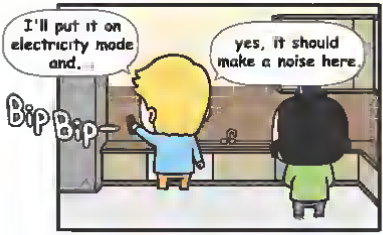
... it didn't look very easy this time.

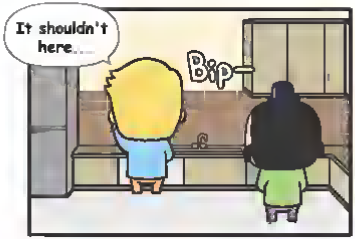


Anyway we found a shelf that we liked.

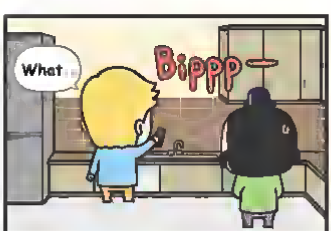
And after we bought
some other tools at a D.I.Y shop,
Mev attempted to put up the shelf.

First he checked what was behind the wall with the detector



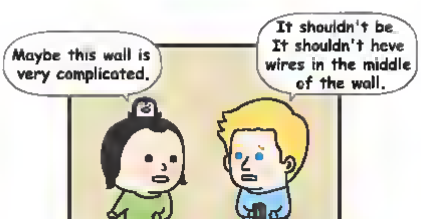


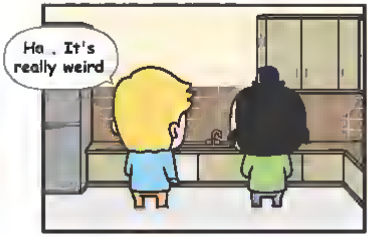
It shouldn't here.....
Bip



What
Bippp

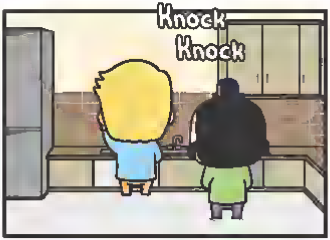
The machine worked well in the other room, but it seemed like it was going crazy in the kitchen.



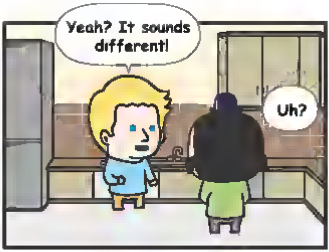


Like the machine,
we were going crazy as well.

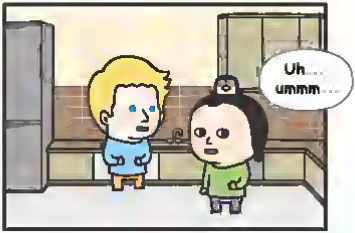
Shall I just do it?
See
Knock
Knock



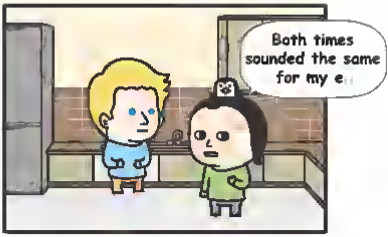
Knock
Knock



Yeah? It sounds different!
Uh?



Uh... ummm...



We were scared.

To be continued...
